WEB DEVELOPMENT ASSIGNMENT : 25

Final Project Level Assignments

---

1. Build Fully Responsive Personal Portfolio Website

Create complete personal portfolio website including home section, about section, skills section, project showcase, contact form and footer. Website should be fully responsive and use Bootstrap with custom theme styling. Add animations for section appearance.
Hint: Use Bootstrap grid for layout, custom CSS for theme, and responsive images. Keep navigation sticky.

---

2. Build Registration And Login Authentication UI System

Create complete UI system for registration and login pages with proper validation messages, password strength indicator, remember me checkbox and forgot password modal. Design should be modern and responsive.
Hint: Use Bootstrap forms, modals and validation styles. Maintain consistent UI theme.

---

3. Build Modern Product Landing Page

Create landing page for product or service including hero section, features section, pricing section, testimonial carousel, FAQ accordion and contact section. Page must be mobile first responsive.
Hint: Use carousel for testimonials, accordion for FAQ and card layout for pricing.

---

4. Build College Website Homepage UI

Create college homepage including top info bar, navigation menu, hero banner, courses section, notices section, events section and footer. Include announcement alerts and image gallery.
Hint: Use Bootstrap grid and cards for course section. Use alert component for announcements.

---

5. Build Responsive Blog Website Homepage

Create blog homepage showing featured blog section, latest blog grid, category sidebar and newsletter subscription form.
Hint: Use grid and card components with responsive layout.

---

6. Build Admin Dashboard UI

Create admin dashboard including sidebar navigation, top navbar, statistics cards, data tables and notification dropdown.
Hint: Use Bootstrap grid, cards and tables with badges.

---

7. Build E Commerce Homepage UI

Create e commerce homepage including navbar with dropdown, banner carousel, product cards grid, offer section and footer.
Hint: Use card badges for sale products and responsive product grid.

---

8. Build Job Portal Landing Page

Create job portal landing page including search bar, job category cards, featured jobs section and company logos section.
Hint: Use card layout and input group search bar.

---

9. Build Event Management Landing Page

Create event landing page including event banner, event schedule section, speaker cards and registration form modal.
Hint: Use modal for registration and card layout for speakers.

---

10. Build Online Course Platform Homepage

Create online course homepage including course categories, featured courses carousel, student testimonial section and enrollment CTA section.
Hint: Use carousel and card components.

---

11. Build Multi Theme Portfolio Website

Create portfolio website where user can switch between dark theme and light theme.
Hint: Use custom CSS theme classes and Bootstrap base.

---

12. Build Restaurant Landing Page

Create restaurant landing page including menu cards, gallery section, booking form and location map section.
Hint: Use cards for menu items and responsive images.

13. Build Hospital Appointment Booking Homepage

Create hospital homepage including doctor cards, appointment form, emergency contact alert and service section.
Hint: Use alert and form validation components.

14. Build Startup Company Landing Page

Create startup landing page including services section, team section, testimonials carousel and contact section.
Hint: Use card and carousel combination.

15. Build Complete Mini Website Combining All Modules

Create mini website combining portfolio, landing page elements, forms, Bootstrap components and responsive layouts.
Hint: Focus on clean structure and consistent theme.
